General Research Target: Synthesizing motions we want!

- ✓ HumanMAC (ICCV'23): The FIRST attempt to predict human motion via training-free diffusion.
- ✓ HumanTOMATO (ICML'24): The FIRST attempt to generate whole-body motions with text description.
- ✓ MotionLCM (ECCV'24): The FIRST time to generate controllable motions in a real time.
- ✓ MotionLLM (Arxiv'24.06): The FIRST LLM-based (billion level) motion understanding model.
